

Technology Solutions for the ICT Sector

With major technological developments in the evolution of the ICT sector, combined with a global economic downturn and difficult operating conditions, Service Providers, Service Developers and Network Operators are competing to maximize market share, revenue streams and minimize operational costs. The ICT market stakeholders are pushing to improve their effectiveness, minimize costs and therefore are refocusing on core business activities.

A major element in meeting this objective is the supporting organization and partners which must have the skills and competence to meet the challenges head on and leverage the value of the core organization and services.

Oghma Services is strategically positioned to assist the ICT sector with its service offering. Operating since January 2002 with a background of many years experience in the technology sector, Oghma Services Ltd is a technology focused services company.

Operating today with a team of highly skilled and experienced staff, we deliver best practice technology services on a global basis. We are dedicated to offering a world-class, cost-effective service to our clients. In supporting your service requirements, we offer a range of services - from Outsourced Training Solutions to Engineering Services.
